

Do Best With Waste

#ERASMUSDAYS

From 14th to 16th October 2021

From a wooden spoon, pieces
of cloth and buttons you can
conjure up beautiful dolls for
the show at school

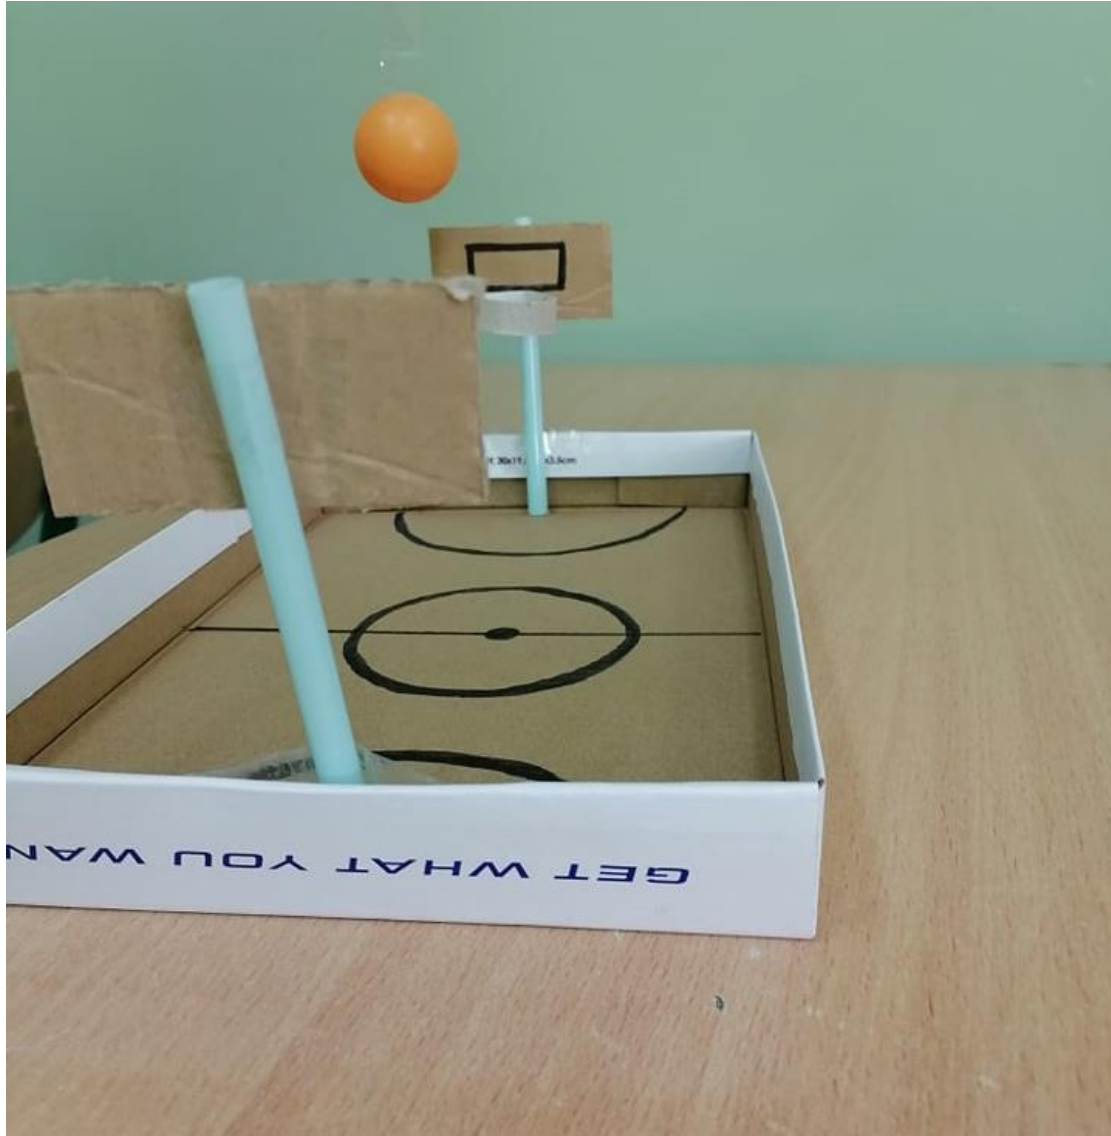

The bottle caps can be used in autumn decorations

We can build a dollhouse or even a basketball court using cardboard boxes

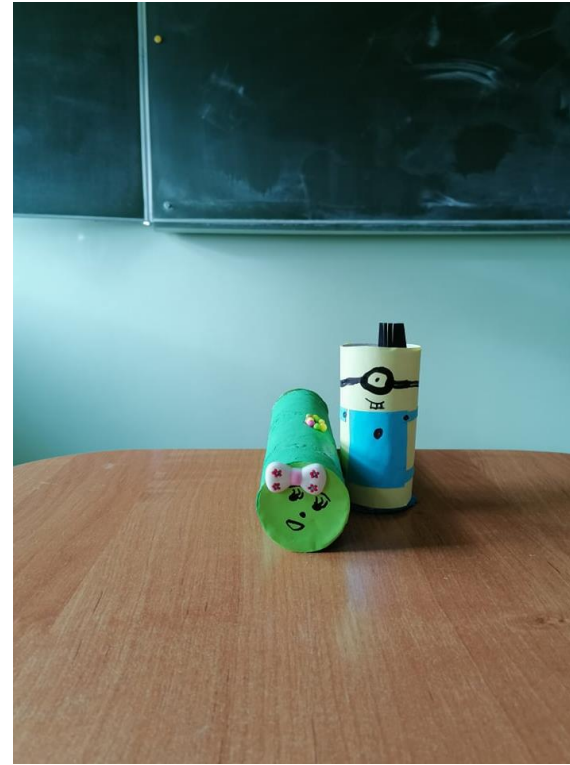

We made butterflies from colored candy wrappers

Sometimes interesting characters are made of rolls of toilet paper, cardboard or plastic bottles

Even the youngest students create interesting things from recycling

Using colored blotting papers,
colored paper, we illustrate some
stories from our books

We made
caterpillars from
the egg wrappers

Sometimes nature and rubbish help us to do something interesting too

Thanks for your attention
